

## **ABORTION!**

Abortion is the extermination of a foetus before it has had the opportunity to fully develop!

It is estimated that there are approximately 42 million abortions worldwide, each year. That results to 115 thousand abortions a day.

We need to ask ourselves why, if we are not ready to be parents, we allow ourselves to have pre-marital sex at all. STI's are rife and kills hundreds of thousands every year.

The majority of all abortions occur in under developed or developing countries (83%), while the remaining (17%) occur in fully developed countries.

Black woman are 3 times more likely to have an abortion than white woman, while Hispanics are 2 times more likely. It's also a known fact that single woman are the ones with the highest abortion rates with 64.4%; married woman 18.4%, and divorced woman 9.4%.

There are a few reasons why a woman may have an abortion but generally, 1% of all abortions occur due to rape or incest; 6% of all abortions occur because of potential health problems to either the mother or the child, and 93% of all abortions occur for social reasons (i.e. the child is unwanted or inconvenient). The scary fact is that 43% of all women will have at least 1 abortion by the time they reach the age of 45, and 47% of all abortions are performed on woman who have previously had an abortion!
